Story of Thirteen Years of Unionizing Effort

FILM INDUSTRY

Crafts Mostly Closed Shop; Players Are Open

How Equity Was Beaten in Recent Campaign

ostensibly because of an effort on the part of the producers to reduce production costs, entailing a reduction of 12½ per cent in wages. The actual issue was their demand that no nonunion men be employed. A national boycott of the films of the resisting studios was saked and its sponsors made an alliance with the film censorship and Sunday theater closing movement because these offered a convenient method of harasing the industry. Sympathetic strikes were urged in various theaters over the country, where the boycotte film product was being shown but neither these nor the boycott itself materialized to any serious extent. Several studios closed down for varying periods because of the strike. In September, through the intervention of the Department of Labor, the strike was ended by a compromise of the wage dispute, the producers standing and the strike on the core shows. (Continued from First Page) LOSE ELECTION

PLAYERS' UNION CHARTERED

In August the A. F. of I. made its first serious move toward unionizing the film players. A charter was made out in the name of the "Motion Picture Players' Union of California" and organizers moved in to sign up the extra players and "westerners." these being regarded as offering the best opportunity. Few signed, however, and the move was presently abandoned.

In December, 1930, the Actors' Equity Association, the new and powerful union of stage actors, took over the job of unionizing film players. The plan was to get all the screen actors to join Equity, then flushed with success and power by reason of its successful eastern strike of the year before, and thereupon to decree that only Equity members could act for the films. This transparent device was vigorously opposed by the Actors' Fidelity League and it was unsuccessful.

In July, 1931, the studio crafts struck again for union recognition, the closed shop and higher wages. The producers stood fast on the open-shop question but, as before, made concessions on the other counts.

CLOSED-SHOP VICTORY

CLOSED-SHOP VICTORY

ing of the studio crafts went on quietly but steadily. Aside from another abortive effort in 1924 by Equity to limit film players to its own membership, everything was apparently peaceful. In 1926, however, the closed-shop forces, then strong in most of the studios, gained their first important victory. The heads of their international unions negotiated with the controlling New York interests of the film industry an innocent-looking two-year agreement to the effect that studio employees should be half union and half nonunion and that union rules and regulations should be in force over the union employees. **GREAT RALLY** 

John D., Jr., to whom he turned over his business interests in 1911, have for some days been purchasing sound common stocks and would continue to do so as "there is nothing in the business situation to warrant the destruction of values that has taken place on the exchange during the past week."

Leading New York bankers held two short informal conferences in the offices of J. P. Morgan & Co. again today, but apart from a brief statement expressing approval of the stock exchange closing, they made no official comment on the day's developments. Reports re-

sastement expressing approval in the monunion interests, union men statement expressing approval of the stock exchange closing, they made no official comment on the day's developments. Reports received by bankers indicated a distinct improvement in the situation, but they again declined to make any predictions for the future.

ness they would be barred for-ever.

There was a storm of protest, even from loyal members of Equity itself. The day following the original order of June 5, the battle was definitely joined by a public announcement from the producers that they would not be restricted in their choice of talent but would continue to sign players under the standard (non-Equity) form of contract.

was largely responsible for Equity's defeat in Hollywood last summer.

Bouty member should thereafter sign any but Equity closed-shop) contracts or work under any save Equity conditions. Contract actors violating this order were to be fined double the total cash value of their contracts and suspended for a year. Actors working by the day (extras) were to be fined all they earned while acting in violation of the order and to be suspended for four months.

Shortly after this Gillmore made his first serious mistake. Apparently anticipating a victory which would force all actors into Equity, he extended the provisions of the order to cover all film players, whether members of Equity or not! This meant that, if Equity won, every film player who had failed promptly to fall in line would practically be put out of business by a rutinous fine and a long suspension. If such players did, not pay the fines they would be barred forever.

There was a storm of protest, for the Oillmore campaign in Hollywood. Oh August 17 Gillmore issued a statement admitting defeat, for which he blamed Miss Barrymore's statement, the "disloyalty" of Equity members who signed contracts against his orders and the failure of organized labor as a whole to support the campaign. In this he apparently referred to an attempt to get the studio crafts to call sympathy strikes in support of Equity, which they had agreed to do only if Equity would promise to reciprocate when desired. This the Equity chiefs declined to promise. Oillmore went back to New York on August 18, saying he would be back to reopen the fight at a more opportune time.

At best, the outcome is only a temporary victory for the open shop. If Equity reaches the desired understanding with the studio crafts the next fight will be a more formidable one. So far as the players are concerned, the industry is more strongly open ahop than ever, but the craftsmen are so strongly unionized that sympathetic strikes by them in support of Equity would produce serious trouble for the film business. The community is strongly with the producers in their stand for the open ahop and if they will stand firm the present victory will be made permanent.

Tomorrow's article will describe some of the substantial, dollars-and-cents benefits which the open shop has conferred upon Los Angeles and

of the act which bears his name and that they feel no concern about the outcome.

"I trust they'll begin right away," he added, "for we all are confident that the act will be upheld and the work will go forward."

Likelihood that Arizona will challenge the constitutionality of the act in the courts led to predictions by Interior Department officials that construction of the huge Boulder Dam project will be postponed until after all legal difficulties have been settled. The opficion is expressed that Arizona's move will take the form of seeking an injunction to hold up work on the dam.

The State commission's action was not unexpected by Wilbur, but he indicated surprise that it had come at this time. Commissioner Mead of the Reclamation Bureau said that if Arizona intends to take the matter to court the sooner it is done the more he will be pleased. Senator Ashurst, Democrat, Arizona, who fought the Swing-Johnson bill for years in the Benate, declined to comment on the action by his State. He had predicted such an eventuality in arguing against the bill.

most remote from the Arisons market. . . . By reason of prohibitive transmission costs and the relatively small demand, Boulder Dampower cannot, under present conditions at least, be used by any of the large power concerns in Phoenix or the large mining camps of Eastern and Southern Arisons.

"It is plain that Arisons cannot accept the act as now written. In its present form and purpose, our commission is advised and is firmly of the opinion that the Swing-Johnson bill is unconstitutional.

"It now appears, however, from the program announced by the Secretary of the Interior, that there will be no substantial excess revenues from the project and that Arisona's right to receive 18 3-4 per cent thereof will be of no value to her.

"From our experience in negotiating with California for a division of water, we are satisfied that further negotiations on that issue would be futile even if the subject were separable from the remaining issue, which it is not.

"Such interstate controversies should be settled by compact, but, with that avenue closed. Arizona's only recourse is to the courts."

MEMPHIS (Tenn.) Oct. 30. (Ex-SACRAMENTO, Oct. 30. (P)-Tony Brown and Walter Burke,

clusive)—More than 2800 contracts between motion-picture producers and small independent exhibitors have been rewritten by the producers this effecting for the "little fellows" a saving of \$1,300,000 in film rentals, it was announced at the convention of the Motion-Picture Theater Owners of America today. The announcement, greeted with ringing applause from the delegates came from New York by special messenger from Sidney R. Kent, general manager of Paramount-Famous-Lasky Corporation, and chairman of the producers committee which carried on negotiations with M. A. Lightman, president of the theater owners. Mr. Lightman read the message.

Mr. Kent's message declared that this probably is the first instance on record of great selling corporations voluntarily relinquishing their rights to money which was contracted for and legally was collectible. The rewriting of the contracts, will, in nearly every case, save an independent exhibitor from ruin, it was indicated.

OTHERS TO BE SIGNED

"The figures are yet short," said Mr. Kent's message. "Two companies have not reported and more contracts are to be redrafted at reduced rentals for films during the heast of present progress, at least 700 mere contracts with the reduced, effecting a further saving to independent exhibitors of at least \$300.

"We do not contend that every exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has received it but were exhibitor entitled to such an adjustment has re

pendent exhibitors of at least \$200.

"We do not contend that every exhibitor entitled to such an adjustment has received it, but we have saved many of them from sever embarrasment or fallure."

"Mr. Kent faced facts frankly." It is admitted." he said, "that aome of the small independent exhibitors should sell out to chains that are setter prepared to serve their communities than they. Again among the thousands of independent theater owners, who are not faced with chain competition, there are many who cannot make money if they are given their films for nothing, they simply were not filted for the business in the first place."

One other prophecy likely to cheer the small exhibitors was made by Mr. Kent. He declared that in his opinion it will, within the next few months, become possible for the small theater to obtain the best sound-picture equipment without making an embarrassing outlay of capital.

GREAT OUTLAY MADE

GREAT OUTLAY MADE

"Producers were up against an even greater risk in making advance obligations than the theater owners. Whereas the exhibitor buys his pictures a year or two in advance, the producers of the country have made commitments that run for fifteen years and have made investments in sound pictures running into hundreds of millions of dollars.

C. C. Pettijohn, general counsel of the motion-picture producers and distributors, commonly called the Will Hays organization, spoke upon the same subject.
"I have seen several thousand arbitration contracts and I think in general they stack up pretty well," he said, "but some, I thought, were

Now all that suffering seems like a horrible nighmare, for I've enjoyed splendid health ever since I fluished the Sargon treatment last April. I took six bottles in all, along with the Sargon Soft Mass Pilis, and now I eat as I please and never have a sign of trouble with my stomach or gall bladder. There's not an arbe or pain in my body and I'm so much stronger, I can do my housework cheerfully and without thring. Those wonderful Sargon Pilis have overcome my constipation and kept me regulated perfectly. Headaches and dizzy spells are a thing of the past. Last-minute efforts to influence the special board which viewed Pacific Coast possibilities from Camp Lewis. Wash, to Camp Kearney at San Diego, today brought a bombardment of telegrams and personal appeals to anyone and everyone in Washington who might be of help in promoting favorable recommendation for Sunnyvale. The action comes on the eve of the special board's recommendation, its report having been ordered prepared by Priday for submission to Congress as soon thereafter as possible.

CAMP KEARNEY PAVORED

PINS FAITH ON NOTE

"Your night telegram of October it saying you were prepared to match San Diego's offer of a free site of 1000 acres was received by Admiral William A. Moffett, chief of the Navy Bureau of Aeronautics, and greatly delighted the admiral and other members of the board of naval experts to choose a dirigible site on the Pacific Coast. Your telegram arrived in time to be incorporated in the report which the board will present to Congress."

NEW YORK, Oct. 30. (P) — A clergyman and a union labor leader today attacked certain churches in the South as being "controlled by mill owners" and inimical to textile trades unions.

Rev. B. Sponford, Episcopal minister and member of the Church League for Industrial Democracy, told a conference on the southern textile industry that the churches in the textile regions of North Carolina are "undoubtedly owned and controlled by the mill owners," and that the clergy are the "moral police for the industrial overlords," Thomas F. McMahon, president of the United Textile Workers of America, speaking at the same conference, attributed his organisation's slow progress in the South in the last twenty-four years to prejudice and bigotry fostered by the churches.

"The pastors would lose their jobs if the workers got a 10 per cent increase," he said.

Use of Indian Money to Put in New Roads Taboo

FRESNO, Oct. 30.—How advertising acts as "farm relief" was described here today in an address given before the Sun-Maid Raisin Day meeting of the Fresno Advertising Club by Don Francisco of Los Angeles, vice-president of the Lord & Thomas & Logan Advertising Agency and authority both on advertising and farm-marketing problems.

"We have been hearing much aboute We persuade former consumers to consume more.

"The experience of California or ange growers offers another example. Backed by twenty-two years of Sunkist advertising, the orange has dehroned the apple as king of fruits. The public may remember the slogan 'An apple a day keeps the doctor away,' but it possesses much more specific and convincing information concerning the health value of oranges. While the American consumption of oranges, while the American consumption of oranges has increased from thirty-two to seventy oranges a year.

EXPERIENCE GOOD TEACHER

"Experience has shown us here in California that we can increase the popularity of California lemons to the point where 35 to 99 per cent of all lemons consumed in this country are California lemons. Twenty-five years ago, chiracy of the lemons consumed in America were supplied by reminding them often of their deliciousness, by pointing out their healthfulness and by teaching the people new uses.

"Advertising is the most efficient and economical means of telling our story effectively and often. Gradually, we influence buying and consuming habits. We win consumers who never consumed before."

ODD LEGAL

OUR LEMONS IN DEMAND

"The California Fruit Growers' Exchange has likewise been able to increase the popularity of California lemons to the point where 35 to 99 per cent of all lemons consumed in this country are California lemons. Twenty-five years ago, three-fourths of the lemons consumed in this country are California lemons. Twenty-five years ago, three-fourths of the lemons consumed in America were supplied by Italy and Sicily."

Francisco cited several other examples of how co-operative advertising has helped lighten the problem of agricultural overproduction.

In the last analysis, relief must come, he said, from decisions made around the American family's dinarge in the various routes proposed but I think will not be a serious handicap."

The new policy is another step in the Hoover administration program of dealing with the Indians on a more equal basis and improving their estates as owners of the land on which they reside.

intensely interesting, Orundy held the breathless attention of a crowded heartng room, as he parried and sparred in turn with Senators Borah of Idaho, Blaine of Wisconsin, and Caraway of Arkansas, coming out of each clash with an engaging and occasionally a distinctly patronizing smile.

BORAH REBUFFED

Senator Borah, stung by Grundy's inclusion of Idaho in a list of "backward" States yesterday, sought to compare his State's expenditure or education, its crime records and its percentage of illiteracy with those of Pennsylvania, only to be told bluntly they were nothing to boast of. Such records were to be expected in Idaho, where no tremendous foreign population complicates the State's problems, Grundy said.

"From your testimony," Senator Blaine declared, "you must be of the opinion that Pennsylvania would be much better off if it seceded from the Union, Mr. Grundy."

"Oh, I wouldn't say that," countries and the Grundy, "Grundy readily admitted that, as reviewed in recently published means to grindly readily admitted that, as reviewed in recently published means to grindly readily admitted that, as reviewed in recently published means to grindly readily admitted that, as reviewed in recently published means to grindly readily admitted that, as reviewed in recently published means to grindly readily admitted that, as reviewed in recently published means to grindly readily admitted that, as reviewed in recently published means to grindly readily admitted that, as reviewed in recently published means to grindly admitted that, as reviewed in recently published means to ground the decadlock in the 1920 Republicant on one were allowed a voice in the framing of such means are relieved to recent were allowed a voice in the framing of such means are relieved from the part of the government by which after an all-night meeting in a Blackstone Hotel room in Chicago, former ambassador to Great Britania beautiful to the secret meeting to the connection."

### MUM REPORTERS JAILED

Three Newspaper Men Given Forty-five Days for Refusing to Reveal Speakeasy List

WASHINGTON, Oct. 30. (P)—Three reporters for the Washington Times, afternoon newspaper, today were sentenced to forty-five days each in Jail by Judge Gordon in the District of Columbia Supreme Court for refusing to reveal to the grand jury the names and addresses of persons from whom they said they purchased liquor.

of persons from whom they said they purchased liquor.

In passing sentence for contempt—easies was to develop news stories of court, Judge Gordon told the trio, Gorman M. Hendricks, Linton Burkett and Jack E. Nevin, Jr., that the questions asked them by the grand jury were entirely proper. The law, he said, does not recognize the ethics of the newspaper profession as sufficient grounds for a plea for immunity.

The men told the court they had bought liquor in forty-nine speakeasies in Washington. Orundy denied that the late John

the political conscience" of the late Senator Penrose, then Republican boss of Pennsylvania.

Grundy willingly submitted to Senator Walsh, Democrat, Montans, that the "backward" States of the South and West have contributed largely to Pennsylvania's wealth by their consumption of its products, but, he added, the West and the South could never have reached their present development if it had not been for the capital supplied by Pennsylvania and eastern States.

WALSH REFUTED

Standing upon his first statement that the "backward" States contribute less to the Federal Treasury than the cost of collecting the contribution, and actually are supported by the large-taxpaying States, he declared that figures produced by Senator Walsh to show that internal revenue collection in Arizona, Idaho, Mississippi and South Dakota far exceed the cost of collection are misleading because all items of expense properly chargeable are not included.

Led by Senator Blaine into a discussion of the relation of the tariff to farm relief, Grundy asserted, "If it is necessary that the farmers should have that \$500,000,000 it was all right to let them have it."

"Your interest in the farmer arises from your benevolence, but not from any economic convictions you have?" asked Senator Blaine. "No," responded Grundy, "it was the promise of the Republican party to help him, and if that is going to help him, he is entitled to it."

Committees Urge Lowering of Minimum Alcohol Quota and Ban on Aperitifs

Who says - "there isn't any "Santa Claus?"

BRUSSELS, Oct. 30. (P)—Radical changes in the legislation regulating the use of alcohol in Belgium are foreshadowed by the recommendations of special investigating committees that the minimum sale quantity of alcohol be reduced from two quarts to one, and the so-called aperitif drinks be abolished.

The committees also suggested that certain imported beers with as much as 12 per cent alcohol be no longer sold.

The second suggestion has met with strong objections even in moderate prohibitionist quarters and it is unlikely that Parliament will transidered an important concession to the antiprohibitionists. Schubert Memorial Gives American Musicians Opportunity for Hearing Hitherto Lacking

NEW YORK, Oct. 30. (P)—The United States, land of promise for musicians of every foreign land, is to have a chance to discover and reward talent too often overlooked among its own young men and women. A group of notable friends of music, known as the Schubert Memorial, has evolved a plan, it was announced today, by which it hopes to win hearings each year for the best of the oncoming young Afherican musicians and to launch a few of them upon careers.

Last season the group sponsored in San Francisco, Chicago, Los Angeles and New York, ten will be selected to contest here in April. From these ten will be chosen two artists whom the Schubert Memorial will present to the nation during the season of 1930-1931.

The scope of this search for native musical talent is to be made national this season and from 200 or more young men and women entered in preliminary competitions.

SUITS AND OVERCOATS

Scientifically and Honestly

THESE tests were devised by the U. S. Government Bureau of Standards. We use the identical methods and the same instruments to keep F&C customers the best dressed men in the longest wearing clothes. These laboratory tests are used in all 5 F& C factories. We believe we are the only thing manufacturers so safeguar ers. We know we are the ori of these revolutionary precision and precaution tests in the men's clothing industry

Our New York Store is at 28 West 23rd Street

OUR owned and operated Foreman & Clark five giant factories turn out over 5,000 garments in the right Fashion every week. No other retailer even approaches this amount. As fast as a new style is approved we show it in our Coast to Coast stores. In other stores clothing is new only at the start of the season. After that it is shown and shown and finally marked down for a sale. Foreman & Clark hold no sales. Everyone pays the same price. Tailoring is next because the 36 hand operations in F&C clothes mould in the shape so that collars stick to your neck and hand draped sleeves fall naturally from handworked shoulders. In other clothing the shape is machined in and is as mechanical as the clothes look after one or two wearings. Tested materials keep the garment in shape and true to color as long as you wear it. We use only 100% wool. In the five Foreman & Clark Factories we test according to the U.S. Bureau of Standards with the identical instruments; woolens for weave, wear, weight, strength and shrinkage. (All F& C woolens are London shrunk.) We test linings, trimmings and buttons and thread. Seams and stitches are tested to withstand two times the strain you will ever give them.

As for value, we give more visible value —good style and more unseen value—inside trimmings: silver Hymo and Belgian Linen than you can buy anywhere. Men who wear Foreman & Clark clothes are the best dressed men in their community. The F&C clothes they buy hold their shape as long as worn. We guarantee every suit for wear, and color fastness, and we keep you well dressed with our free pressing and minor repair service when and as often as your clothes need it. You can't buy more style, more value, better materials, longer wear or as much after purchase service as Foreman & Clark give you if you pay ten times the price for your clothes. Let us prove it!

YOU SPEND ONE-THIRD OF YOUR LIFE IN BED

Why not be REALLY comfortable?

You will get a new idea of what sleep can really be with a Nachman Feather-Spring mattressthe finest spring mattress in the world

THE average person spends 8 hours out of the 24 in bed. And the reason we go to bed is to rest our bodies and brains . . . to accumulate energy for the day that follows. Sleep is the only complete form of rest! There is no substitute for it. Deprive yourself of a single hour of sleep, and you have materially reduced your health and efficiency!

Scientists have determined that the average person loses the benefits of two hours of sleep each night through wakefulness and restlessness. The principal reason for this loss is lack of comfort! The mattress upon which you sleep is a vital factor in your life.

The Nachman Feather-Spring mattress is recognized as the most comfortable spring mattress on the market today. Its spring construction, embodying the patented conical feature, gives a resiliency and ease unapproached by any other. Each spring is a separate unit . . . does not even touch the spring next to it. The Nachman Feather-Spring mattress has these advantageous features exclusively. \$39.50 everywhere.

The word "Nachman" is recognized as a mark of protection wherever it appears on spring-filled products. Nachman springs, embodying the same patented principles, are essential parts in select upholstered furniture and in the upholstery of obiles noted for their comfort and riding case. No comment was made by the officers and A. J. Hooser, manager of the plant, stated that it must be a misunderstanding.

Hooser says that the company has held a permit for a five-gallon still used in experimental purposes in the distilling of an orange tonic of alcoholic content which might be produced in commercial quantities. The prohibition officers told Hooser they had orders from Los Angeles to get the still and bring it in.

Hooser says the still has been used only for experimental purposes and no alcohol has ever been made.

Small Investors Rush in to Buy Stocks Outright in Odd Lots; Local Prices Rally Sharply

BY EARLE E. CROWE

Bargain-time in the stock market has not been overlooked by the shoppers. The first page publicity in the newspapers is drawing a host of people into the brokerage offices to pick up bargains in common stocks, and unquestionably this stream of buying in small lots accounted largely for the impressive rally yesterday in prices.

People who never before were in the stock market are called.

### Unaffected by Market Recessions

ALIFORNIA District Bonds are one investment which is unaffected by violently fluctuating market conditions. The holder knows that his principal is secure and his income sure and dependable, regardless of hectic days in Wall St.

These bonds represent the very bedrock of all securities-being payable principal and interest from direct ad valorem taxes collected with and

as a part of general City and County taxes. The yield is decidedly liberal and is completely exempt from all Federal Income Tax and State and local taxes in California.

We believe everyone-regardless of his other holdings can well afford to keep a portion of his funds in this basic, non-fluctuating security which can always be depended upon in days of storm and stress.

# This Is BARGAIN DAY

Whether the present break be termed technical, fundamental of forced, all stocks have suffered. The force of the movement drove the good as well as the overboomed stocks down to the very low levels.

RESULT the greatest buying opportunity of the decade is now presented to you. A chance to buy, at "bargain" prices, dividend income stocks. Securities that combine the soundness of conservative investment with an excellent speculitive condition which should bring handsome returns if taken advantage of at once.

In our opinion the upward movement in the selected Class A security.

In our opinion the upward movement in the selected Class A securities will be almost as marked, and that it will come quickly.

During Wall Street reverses mob psychology always asserts itself, temporarily forcing quotations on Class A securities far below their proper level.

To select a relative rating of stocks out of more than a thousand companies listed on the various exchanges requires the services of those in immediate touch with the market situation.

To those wishing to choose the genuine "bargains"—whether for diridend income or quick market play—we extend an invitation to open an account with us on a conservative basis.

We will gladly advise with you in the selection of those securities which we believe have reached the "burgain zone" and should be the leaders in the next apward swing. Enjoy the benefit of our cloud touch with the market, our experience and our expert knowledge of the present situation and its probable consequences.

# What IS this institution?

AN OLD-FASHIONED, SMALL-TOWN FINANC-IAL INSTITUTION . . . with three State thrift records . . and \$14,000,000 resources . . is never coldly astonished . . when it finds a prospective client . . who wants to know . . WHAT a building and loan associa-

Why, it has taken US 361/2 years in the MUTUAL Building and Loan Association of POMONA, to learn what many a newly officered, newly organized insti-tution, assumes to know immediately. That isn't surcasm or cynicism! Among neighbors and friends, in Pomona Valley, you can't be that way successfully.

YOU GET 6% SAFELY .. AND CONVENIENT WITHDRAWAL . . with State supervision . . for your money . . in any well-conducted building and loan association.

That isn't enough in the way of financial service for the clients of the MUTUAL Building and Loan Asseciation of POMONA. They have the guarantee of \$3,000,000 capital, surplus and reserve, carrying uplimited liability. With a PAST HISTORY of one loan loss in 361/2 years. And economy, for safety.

We answer your questions, thoroughly, and serve you conveniently, in Los Angeles, in our 10th floor offices. With one hour's free parking, in the basement-garage, just south of 7th Street, on the west side of Spring Street. Take the elevator, and we gladly validate your parking tienet.

After this is filed with the Supervisors legal procedure calls for an election on the issue in the Ana-helm district. The annexation pe-

tition was received by Mitchell yesterday from the Fullerton Junior College board and was passed on to the Supervisors.

While Brea-Olinda High School district is said to be favorable to the annexation proposal, the Anahelm district is understood to regard with greater preference the proposal to join a Southern Orange county junior college district, an attempt to organize which recently was launched by Santa Ana Junior College district, Anahelm could not join such a district, however, until after it was organized, with Garden Grove and Orange High School districts included, so that Anahelm district would be contiguous territory. L. Hagenbaugh of the West Los Angeles division attested yeaterday. Possibly some other city can produce a police captain who is a landscape and seascape artist, but until more nominations are heard Capt. Hagenbaugh stands unique. An exhibit of his paintings is on display at the West Los Angeles Library.

When seen yesterday in his office at the police station, he was surrounded by some striking desert handscapes which he had painted. Up before dawn on his day off he drove to the Mojave Desert, where he set up an easel and transferred to canvas the marvelous colors of the waste and the surrounding the has been in the police department.

The plot had proceeded so far that a house had been renied in duties of a police commander until another day. With him he brought he was to be lured by a telephone he had captured on canvas.

All of Capt. Hagenbaugh's spare time is spent on the desert or on the shore, painting landscapes and marrines. He has ranged the shore line from Santa Barbara to San Diego, painting seascapes, but he price the desert views. His works have been commented on favorably by art critics.

His youthful ambition was to be an artist and though all of the art education he received was in San Francisco twenty-five years ago, Capt. Hagenbaugh has continued his painting through the principals in the plot are known, it will be impossible to prosecute them. Something apparest'ly does need correction, however." After assuring Cryer that all of his rights will be protected, the court saif: "In accordance with my custom I shall continue to overlook matters which occur outside of the courtroom until they properly are brought before me for attention. Action cannot be taken until an affidavit is brought before this court. Brockman then declared that "this radio talk last night was undoubtedly for one of three purposes. It was either to attract attention, to influence prespective jurors, or to intimidate me and induce me to go slow before I step on Rev. Shuler's toes.

"Any effort to intimidate the proceases of this court is contempt. There is one of two things to do. However, with some seats and covers of the court is contempt. There is one of two things to do.

There is one of two things to do, either it is up to me to make a motion to cite Shuler for contempt of court or for Mr. D'Orr to do all he can to induce his client to heep still. I now request that he do this."

D'Orr then turned to Shuler, who had entered the court-room a few seconds before from Municipal Judge Ambrose's court, where he had been a witness for the State against members of the cast of "Bad Bables." On trial for asserted participation in an indecent show, and told his client that Cryer and Brockman had taken exception to his remarks over the radio on Tuesday night commenting on the selection of a Jury. "They have suggested that I sak you to refrain from comments which might affect the administration of this case," the defense attorney continued. "I now make this request." Shuler made no answer.

No progress was made in the selection of a jury for the libel trial yesterday. Judge Pope's court was adjourned during the morning to allow Shuler to appear in Judge Ambrose's court and again was adjourned during the morning.

#### PLOT TO SNARE FITTS REPORTED

Aide Discloses Discovery of "Frame-up" Scheme

Woman's Confession Cited by District Attorney

Names of Those Involved in Conspiracy Withheld

Fitts and thus force him from office was declared yesterday by Percy Hammon, deputy District Attorney n charge of grand jury matters, to have been discovered and disrupted Fitts stated that he received infornation of the plot Monday, and that by Tuesday his men had obtained a signed confession from a woman who was to have aided in execut-

any names.

It was declared that the plan was financed by persons who promised a large sum of money to anyone who could successfully "frame" the District Attorney and end his campsign against crime in Los An-

able to force Fitts from office with the threat of exposure.

DETECTIVE GIVES "TIP"

The original tip on the asserted plot came from a detective in a suburban police department. Fitts declined to reveal his name. Although the District Attorney would not state where the plot was discovered, it is associated closely with a hurried trip that he made to Long Beach Tuesday afternoon. At that time, unable to locate his own chauffer, Fitts appealed to the Shoriff's office for a "fast" car and driver and was driven to Long Beach by Jack Ousby, a deputy sheriff attached to the burgiary investigation detail.

The District Attorney assed the following statement regarding the attempted "frame-up:

"I have no atatement to make other than that members of the bureau of investigation of this office and a suburban police department were able to completely demolish the plan.

"The scheme was the result of a combination of forces in this city who were disastisfied with their failure to control the office. From the moment I took office up to and including last night I have been trailed constantly, and if they have anything, let nem produce it. If they had had anything, they would have produced it a long time ago."

Boulder Dam Power Award Cuts No Figure

Gravity Flow to Southland Engineers' Quest

(Continued from First Page) (Continued from First Page)
have been given explicit instructions to bend every effort to find a
feasible route that will permit of
the bringing of water to our cities
without the expense of pumping.
"Within a few weeks three internationally famous engineers, selected
as a board of review on the aqueduct project, will arrive in Southern California and begin the task
of selecting a route for the aqueduct. These men have been given
instructions to give particular attention to the gravity aqueduct
problem.
"The board of directors of the

either eventuality. That is why we applied for a large block of Boulder Dam power.

"If a pump route is shown to be the best route, we have obtained an allocation of power to meet that situation. If a gravity aqueduct is selected the power allocated to the district may be turned back to the givernment and reallocated to other applicants. In fact, Secretary Wilbur already has set up a plan under which such a reallocation weight be made to other applicants.

We feel that the Metropolitan District has been extremely fortunate in securing this allocation of Boulder Dam power. Such an allocation has been made because Secretary Wilbur fully realizes the great need for Colorado River water on the part of Southern California cities. He recognizes this need as a paramount one and has given it precedence over all other requests for power by making the generous allocation that he did."

Mr. Whitsett stated yesterday that Chief Engineer Weymouth of the district expects to place a detailed Colorado River aqueduct report before the board of directors some time in November. This report, Whitsett said, will cover the six years of survey work thus far carried forward on the aqueduct project with the view to locating the most feasible and practicable route for the line. Scores of possible routes will be discussed in the report, it is declared.

With all of the data contained in the Weymouth report before the directors, the actual selection of the best possible route for the aqueduct will be left in the hands of an engineering board of review. This board, composed of A. J. Wiley of Boise, Idaho, Thaddeus Merriman, chief engineer of the New York City water system, and R. R. Lyman of Sait Lake City, is expected to begin its investigation about the middle of November. NEED REALIZED

PUMP LINE LESS COST

Preliminary surveys indicate that the most econemical type of aqueduct to build, so far as initial construction costs are concerned, is one which will require the lifting of the water some 1600 feet. On the other hand, several possible gravity routes have been suggested which would eliminate the expense of pumping the water. These lines, however, it is indicated, are much longer and therefore may be so costly as to be beyond the ability of the district te manne.

Whether the annual carrying charges on the additional cost involved in the construction of a gravity aqueduct will overbalance the additional logerance involved in a line necessitating pumping is one of the large problems facing the engineers. Chairman PUMP LINE LESS COST

The chief danger in the recent vio-lent fall in stock prices, so far as busi-

ness in general is concerned, is largely psychological. It is true that many individual speculators and speculative groups have sustained tremendous paper es, which probably will cramp their rations for some time to come. But part from the fact that speculative anyway, no real money that has gone nto the stock market has actually been

lost. What one group has lost another has gained. The sum total remains the same. Unless deflation should go far enough to bring about an actual money stringency—which, due to sound business conditions and the solid monetary foundation created by the Federal Refoundation created by the Federal Re-serve system, is not likely—the greatest peril in the situation is in loss of public confidence. And for this there is no real reason.

It is important for the public to get the distinction between values and prices. The value of any security depends upon the condition, assets and earning power of the issuing corpora-tion, these determining both the return it will give to the investor and the safety of his investment. The price depends upon supply and demand, demand being influenced by intrinsic value, but not inncing it. There are many other fac tors of demand and hence of price; but there is only one creator of value. In the long run, value and price will tend to coincide, but it cannot be said that they will do so at any particular time.

For months it has been apparent that the patrons of the stock market have paid little attention to values and have been concerned almost solely with prices and changes in prices. Months ago in these columns The Times pointed out as emphatically as possible that this condition had created a grave danger for the speculator, since the inevitable sequel of inflation is deflation; and that inevitable result has now come about. It is possible the market will not settle down until the pendulum has made its full swing and prices are as much be low actual values as they have been above them. But this again has no effect on the intrinsic worth of the stocks

affected. Such phrases as "disastrous crash," "enormous losses" and the like are somewhat misleading; disaster for are somewhat misleading; disaster for the bulls means prosperity for the bears; enormous losses on one side become translated into equally enormous gains on the other; and the total of buying power, which is what really counts, re-mains undisturbed. So long as the foundation remains sound, the apparent losses even on permanent investments made at conservative mides are paper. nade at conservative prices are paper asses only.

But the general public at times fails to realize this, takes these alarming phrases at their face value, and gets into a state of mind which is apt to have a

Business is sound and banking is sound. The bankers of the country have been aware all along of the hollow nature of this stock market boom and have not permitted their credit facilitie m and to become unduly involved in stock transactions. Warning after warning has been issued by the bankers, and if nobody else has heeded these warnings, it is certain the bankers have taken their own advice. Just as they refused, in the face of tempting possible profits, to aid the speculative orgy, they will now refuse to sanction curtailment of the legitimate credit requirements of the country, and their attitude cannot fail to have a stabilising effect.

The severe lesson given to uninformed speculators by the recent crash is like-ly to have one very good effect in re-leasing for legitimate business purposes ly to have one very good effect in re-leasing for legitimate business purposes a large part of the huge sum which hitherto has been tied up in stock-mar-ket operations. his Western Air Express trimotored liner safely to port at Albuquerque, after a twenty-hour delay caused by being forced down temporarily through the fury of a New Mexico snowstorm, he scored a triumph for air travel that is full of promise for all who are looking to more assured safety for those who go up to the skies in ships.

No harder test could have been imposed on the quality both of the pilot and his craft than the experience of the air liner in its fight with the fury of the elements which involved not only landing under the most difficult conditions to which an airplane can be subjected.

Los Angeles Water Supply
SAN MARINO, Oct. 23.—[To
the Editor of The Times: I Your
editorial article or "Colorado
Aqueduct Plans" contains a suggestion similar to one of mine
that will appear in the November issue of "Water Works and
Cewerage." I refer to the suggestion that more consulting engineers be employed and that
they be selected from many different sections of America. I go
further and urge that they be
split up into small, competing
boards so that a "me too" tendency will be eliminated. Pinalily I believe that these consulting engineers should investigate
of are sources of water supply
such as the Mono Lake basin
and Walker River, with a view to
postponing the building of the
Colorado River aqueduct for ten
years or more.

In Sunday's Times you published an account of the Mono
basin project, in which it is
stated that 180 second feet or
water are available there. At
160 gallons per diem per capita
this would supply 700,000 people
with abundent water for both
domestic and industrial use. I
note that the City Engineer of
San Francisco recently estimidated that 100 gallons is a sofficient per capita daily allowance for such purposes. It is not
unlikely that the 186 second feet
inght serve 1,000,000 people.
The engineers of the Los Angeles Water Department have
usually estimated 5000
supplied per second foot.

But why stop at Mono? Immediately adjacen' to the morth

This item relates almost entirely to irrigation of the estimated consumption of the "metropolitan area. Los Angeles county" in 1950, which total conjumption is estimated at 1,359.09 aer feet.

by THORTON W. BURGESS THE BOR WHITES ARE SAVET

Huddled together in a circle, tall to tail, Bob White and his family crouched as flat as possible in a patch of bushes and tall grass, near the edge of Farmer Brown's cornfield. Across the Green Meadows from the Green Forest came a hunter and his dog. The dog was running this way and that way ahead of his master. He would go so far in this direction and then turn and go so far in the opposite direction. He was doing what is called quartering the field. He moved quickly, and all the time his

A series of X-ray pictures taken yesterday will tell today the story whether Colleen Moore must go to a hospital for an operation for appendicitis, the actress said yesterday. The pictures were taken by Dr. F. A. Lewis. "I don't look forward with joy to an operation but if the doctor says I must that's all there is to it," she said yesterday. "I am able to be up and around but I am not feeling so well." Since her hurried return from New York, Miss Moore says she has felt fairly well although she had a serious attack in the East.

Witnesses at Trial of Screen School Head Says Pictures Made Poorly

Screen tests of students at the United Talking Picture Company were made poorly and of little practical use, two casting directors testified yesterday in Municipal Judge Sheldon's court where the company, and U. M. Dalley, its owner, are on trial on petty-theff charges in connection with \$150 accepted as "tuition" from L. P. Charry of Compton.

The winesses, F. A. Datig of the Paramount studios and Fred Schussler of United Artists, were the final prosecution witnesses called by Deputy "City Prosecutor" Hornaday. Charry testified that he paid his tuition with the understanding that the "film school" would make him a star film actor.

Dalley then took the stand in his own defense and denied making false representations to Charry in regard to training him for film roles. Several students of the school also were called as defense witnesses and more are expected to be summoned to the stand to-day. United Talking Picture Company

Indian Chief Will Sing at Philharmonic

BY ISABEL MOBSE JONES A member of the original Ameri-can race, Chief Yowlache, is to sing with the Philharmonic Orchestra on Sunday afternoon and in addition to a large, resonant basso-cantante voice and superior training, he is possessed of a fine loyality to his own people. Through music he hopes to speak to the white Americans of the redmen—and for Sunday he has chosen the music of four westerners who have caught the spirit of his people: Homer Grunn, Anita Balawin, Carlos Troyer and Earl Blakeslee. Yowlache is of a northwestern tribe and of commanding presence. His black eyes are accustomed to distance and it.e has been looking forward to a career as an artist since his voice was discovered in an operetta at the Indian trade school at Tacoms. He played football too, at the Tacoma school, but the singing success decided him and he has not jost his ambition through a long struggie.

Bince the school days Yowlache has worked in the Indian reservation schools and in the logging camps to earn money for lessons. The outdoor life of the lumber camps made him happy, but the work was too hard and there was too little opportunity for a singer, so he came down to Southern Cali-Sunday afternoon and in addition to

Both the new contract and the vacation are rewards for the European director's exceptional work in making the above named picture. Lasky stated. This all-Technicolor musical romance has kept a east of several hundred persons busy vince late summer and is said to be outstanding on Paramount's current production program. Dennis King, noted New York musical compady star, plays the leading role.

While in Europe it is likely that Berger will pick up a story or two which he will recommend to Lasky for purchase.

Educated from boybood for an artistic career, Berger first attracted attention as a composer and musical director. He later attained fame as a poet, author and playwright. From writing for the stage he turned to directing and producing.

LEWIS DEMANDS CHAMPIONSHIP

Referree Don McDonaid has already satisfactorily explained his decision that night, according to close followers of the game. The fact that the seconds of both wrestlers were suspended indefinitely by the State commission is said to show that both of them entered the ring while the match was still in progress. This indicates, it is said, that McDonaid's count was official and that Lewis should have kept his eyes on the referee and not on the time-keeper for any and all railings inside of the ring.

It appears to be Lewis's contention that if there had not been two counts on Sonnenberg that night, he would have been prepared for the champion when the latter came back into the ring and bowled him over for the deciding fall. The time-keeper deciding fall. The counting, and rather than contust the wrestling fans with the start counting, and rather than contust the wrestling fans with the two counts, he tolled the seconds off to the referce, who in turn contust them out to Sonnenberg as the latter attempted to get back into the ring before the count of twenty.

Overconfidence will not be present in the Occidental varsity football eleven Saturday when it meets the San Diego State Axtees in the first of the Tigers' 1828 Southern California Conference games. Instead a keen determination for an initial victory coupled with a fear that the southerners are due to hit their stride after a bad start expected to bring an Oxy triumph. San Diego took a sad beating at the hands of Redlands recently in a conference game which would indicate none too great strength at ye southern camp. But Oxy had a tough tussle in whipping San Diego last season, and with the Axtees boasting practically the same eleven and a number of reserves. Alan Dehoag and his Tiger mates are taking no chances of being upset and surprised and will be fighting like mad from the first whistle.

It is quite true that Mr. Doyle did exceed the previous record for gate receipts in this State, but the fight warranted more than the 21,000 turnout of fans. Hudkins has been a favorite here so long that his chance at Walker's title should have brought a tremendous response. But the old burn burn about the football games interrupted the sequence of the fight ballyhoo, and the \$151,000 gate was quite remarkable under

the first touchdown for California against Penn at Philadelphia last month.

But one of the real dark horses of the California squad this year—dark until the Washington State game—is Bill Medanich.

He is a former Lincoln High School boy, and played in the backfield there in 1926.

On the roster he is known as Frank Medanich, but I have it on the word of his brother that the given name by which he always has been known is Bill.

In fact it is "Butcher" Bill.

"Butcher" Bill lasped into prominence in the Washington State game, when he took the place of the crippled Bear captain, Roy Riegels, at center, and played the whole game.

That earned him his Big O and canabled Coach Nibs Price to save Riegels for the crucial Penn game the following week.

and the Cardinals failed to eash in on any of their numerous opportunities.

"Individually the Cards were not so bad but as a team they put up a sloppy exhibition. The interference was as good as nothing most of the time; the tackling was ranged; the players seemed o lack their usual pep; the forward passing was terrible and the signal-calling bordered on hallucinations. Why dianford ever spent last week working out behind barred fences is a great mystery. The team showed absolutely nothing new in the way of plays and at the same time failed to use some of their best old ones.

"Stanford was just plain outfexed."

Warner characterized the article as "the rottenest thing that could possibly have been written about the team."

"The boys," he continued, "played their best the whole time and any Stanford man should be proud to be represented by such an outfit." And now the Daily sports editor is on the outside looking in—wistful-ly. A RETURNED PRODIGAL

American Legion Speedway November 10.

"Speed" Hinkley, the Pasadena dare-devil, won the long-distance grind at San Jose, and thereby jumped into the local picture as one of the favorites in the bigrest race of the year at the Legion track.

Johnny Krieger, driving his Fisher Special, broke the record for the San Jose track when he manuscred around the course in 26 seconds flat for a lap. The feat virtually proved that Krieger possesses the fastest mount in the West, inasmuch as the Los Angeles pilot already held the record for the Legion Speedway, a mark which he set at the last meeting here. His time on that eccasion was 25.6 seconds.

The season's largest entry list is predicted November 10 with out-of-town drivers planning to compete here. Fred Merzney of Denver, Fred Cooper of Chicago and George (Swede) Smith of Portland are three of the invading contingent who are rated as highly formidable and who will enter themselves and their mounts with A. C. Pillabury of the A.A.A.

ESAU AND BURCHARD TO MIX AT PASADENA

It will be Halloween celebration with a difference tonight for many Pasadenans who will attend the program at the Pasadena Arena. Two "main events" of eight rounds each are to be presented, as well as a strong supporting card. Ladies will be admitted free.

Closing the show will be Kid Essuand Don Burchard, lightweights. The other eight-rounder also presents a big Pasadena favorite in a small package, little Canto Robleto, flyweight. He will fight Johnny Gabuco, who gave him the hardest fight of his career not so long ago. Poster Manaio and Al Sing, another pair of flyweights, will fight the four-round special event. Four-round preliminaries will be: Andy Dumiller vs. Al Ledford, 180 pounds; Lawrence Browne vs. Mickey Lewis, 140 pounds.
